Summary

Full-Stack Developer with internship experience in delivering 2+ production-level applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Skilled in **JavaScript** and **Python**, with expertise in **REST APIs** and **authentication** systems. Currently exploring **Generative AI** and **LLMs** to create intelligent, user-focused solutions.

Education

- **Bachelor of Technology in Computer Science and Engineering (AI&ML)** 2023 - Present
School of Management Sciences, Lucknow SGPA: 7.7
- **Secondary and Senior Secondary School [PCM]** 2019-2022
Scholar Academy, Lucknow

Technical Skills

- **Full Stack:** React, Next.js, Node.js, Express, Tailwind, Bootstrap
- **Languages:** TypeScript, JavaScript, Python, C
- **Database & Security:** MongoDB, JWT, OAuth 2.0
- **Tools and Platforms:** Git, GitHub, Postman, VSCode, Replit, Jupyter

Work Experience

Frontend Developer Intern | RevLabz.ai (Remote)

Nov 2025 – Jan 2026

- Designed responsive UI using React.js & TypeScript, improving cross-device compatibility for 3+ screen sizes
- Integrated REST APIs and optimized frontend performance, reducing load time by ~20%
- Identified and fixed 15+ bugs, improving application stability and user experience
- Collaborated with backend team to integrate database and authentication features (JWT-based)

Projects Experience

Project 1: Evalify – AI Evaluation & Interview Platform

- Built full-stack MERN platform supporting 100+ user sessions (simulated/testing)
- Implemented AI-based resume scoring system using LLMs, improving accuracy by ~30%
- Built mock interview system with video + coding environment integration
- Designed scalable REST APIs handling multiple concurrent requests

Project 2: ResumeVault AI – JD specific AI Resume Builder

- Built AI resume builder generating ATS-friendly resumes with 80%+ ATS score
- Integrated OCR (Tesseract.js), reducing manual input by ~40%
- Implemented LLM-based content generation improving resume quality and keyword optimization
- Developed secure authentication (JWT), ensuring 100% user data protection flow.

Project 3: Krishi Sakhi – AI-Based Farming Assistance Platform

- Engineered full-stack application using React.js, Node.js, Express.js, MongoDB
- Implemented AI-based crop recommendations using soil and weather data
- Integrated APIs for real-time insights
- Improved decision accuracy by ~25% and supported 50+ users (testing)

Certifications

- Full-Stack Web Development Certification – **Udemy**
- Python Programming Certification – **GUVI**
- Machine Learning & Deep Learning Training (10 Days) – **AMigo India**
- AI Tools Workshop Certification – **Be10X**

Additional Information

- Winner- Innovation Hackathon 2k26, Awadh Incubation Foundation KMCLU Lucknow(competed among 50+ teams)
- 2nd Position – Ingenuity 2k24 (top 2 out of 40+ teams)
- Student Placement Coordinator (School of Management Sciences lucknow)
- Participant – Smart India Hackathon 2024 & 2025
